# Autoclavable AlphaMop™
## Cleaning System

## Description

The Autoclavable AlphaMop™ showcases a large thermoplastic mop head and was built on the framework of Texwipe's original, popular AlphaMop. The TX7108A utilizes state-of-the-art polyester wipers, AlphaWipe® by Texwipe.

The AlphaMop system features easily changeable, laundered polyester covers that fit over a flat-padded head assembly. This arrangement permits users to rapidly change wiping surfaces and foam pads as they mop, adhering to strict wiping protocol. The AlphaWipe polyester cover provides the cleanest substrate available for cleaning walls, floors and ceilings. The replaceable foam pad ensures that the polyester cover conforms to textured floors and other surfaces.

The Autoclavable AlphaMop is the easiest and most efficient way to maintain walls, ceiling and floors in aseptic and cleanroom environments.

## Applications

► Ideal for critically clean or cleanroom environments
► Preferred for cleaning of walls, ceilings and floors
► Designed for cleaning processes requiring low particle, extractable and ionic contamination

## Features

► Fully Autoclavable mop system: 15" x 8" mop head, 60" fiberglass handle, AlphaWipe mop covers, laundered, foam pad
► Rapid change mop covers and foam pads
► Low profile, swivel head
► Lightweight
► Bag-Within-A-Bag cleanroom packaging

## Benefits

► Steam Sterilizable, Multi-Use Mop system
► Excellent durability
► Efficient coverage of wiping surface
► Ultralow particle generation and extractables in AlphaWipe mop cover
